

Use of School District Equipment	C.22
<i>Adopted: July 23, 2013</i>	

School district equipment is acquired with public funds and or donations and is to be used solely for the benefit of the school district to support its educational programs.

The district will not allow the removal of school district equipment from the buildings for personal use.

A teacher request to the building principal and a principal request to the superintendent for temporary usage of school equipment off school premises may be granted for instructional purposes. The building principal or superintendent will ensure that temporary usage forms are completed for each such request before the loan is made.
